WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

SUMMARY RISK INDICATOR

The risk indicator assumes you keep the product until 29 May 2026. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because the Issuer is not able to pay you. The Issuer has classified this product as 3 out of 7, which is a medium-low risk class. This classification results from two elements: an estimation of the market risk that rates the potential losses from future performance at a low level, and an estimation of the credit risk, according to which poor market conditions are unlikely to impact the capacity of the Issuer to pay you. You are entitled to receive back at least 100% of the Issue Price. Any amount over this, and any additional return, depends on future market performance and is uncertain. However, this protection against future market performance will not apply if you cash-in before 29 May 2026. If the Issuer is not able to pay you what is owed, you could lose your entire investment.

PERFORMANCE SCENARIOS

Market developments in the future cannot be accurately predicted. The scenarios shown are only an indication of some of the possible outcomes based on recent returns. Actual returns could be lower.

This table shows the money you could get back until the Maturity Date, under different scenarios, assuming that you invest EUR 10,000. The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the product. The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where the Issuer is not able to pay you.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.
