General Information

The KAIROS INTERNATIONAL SICAV (the "Fund") was incorporated for an unlimited period on September 28, 2006 as a société anonyme under the laws of the Grand Duchy of Luxembourg and qualifies as an open-ended société d'investissement à capital variable with UCITS status. The Articles of Incorporation were published in the Mémorial of October 9, 2006.

The Fund is registered with the Registre de Commerce et des Sociétés of Luxembourg under Number B 119 723. The Fund was incorporated with an initial capital of 300,000 Euro. The Shares subscribed for by the Founders at the incorporation of the Fund were transferred to investors subscribing in the period during which the Shares were initially offered. The capital of the Fund shall be equal to the net assets of the Fund. The minimum capital of the Fund is EUR 1,250,000.

The Fund is authorised by the Luxembourg supervisory authority as a UCITS under the amended Law of December 17, 2010 relating to undertakings for collective investment.

Since September 1, 2014, the Board of Directors of the Fund has appointed Kairos Partners SGR S.p.A. to act as Management Company of the Fund. The Management Company is an incorporated company under Italian law of May 20, 1999 and controlled by Julius Baer Group Ltd.

The subscription proceeds of all shares in a Sub-Fund are invested in one common underlying portfolio of investments. Each share is, upon issue, entitled to participate equally in the assets of the Sub-Fund to which it relates on liquidation and in dividends and other distributions as declared for such Sub-Fund or Class. The shares will carry no preferential or pre-emptive rights and each whole share will be entitled to one vote at all meetings of Shareholders.

Shareholders' information

The annual general meeting of Shareholders shall be held each year at the Fund's registered office or at any other location in Luxembourg which will be specified in the convening notice to the meeting.

The annual general meeting shall be held on the second Tuesday of the month of April or, if such day is not a Business Day, on the next Business Day thereafter.

Shareholders will meet upon the call of the Board of Directors in accordance with the provisions of Luxembourg law.

In accordance with the Articles of Incorporation and the Luxembourg law, all decisions taken by the Shareholders pertaining to the Fund shall be taken at the general meeting of all Shareholders. Any decisions affecting Shareholders in one or several Sub-Funds may be taken by just those Shareholders in the relevant Sub-Funds to the extent that this is allowed by law. In this particular instance, the requirements on quorum and majority voting rules as laid down in the Articles of Incorporation shall apply.

The Fund will publish an annual report, including audited financial statements within four months after the end of the business year and an unaudited semi-annual report within two months after the end of the period to which it refers. Annual report, including audited financial statements and un-audited interim reports for the Fund combining the accounts of the Sub-Funds will be drawn up in Euro. Both sets of reports will also be made available at the registered office of the Fund.

The annual report, including audited financial statements will be mailed to Shareholders at their registered address upon request. The accounting year of the Fund starts on January 1st and ends on December 31st each year.

Portfolio movements are available to Investors upon request, free of charge at the address of the registered office of the Fund.

Kairos International Sicav - Bond

MARKET REVIEW

In 2023, despite the challenges faced by global financial markets, they exhibited robust resilience, concluding the year in positive territory. The first quarter started positively with good news from the U.S., China's opened after Covid, the slowdown of the inflation and positive macro data. However March proved to be a challenging month. The closures of two U.S. banks, Silicon Valley Bank and Signature Bank, prompted intervention from U.S. authorities to safeguard deposits. Credit Suisse received a lifeline through UBS acquisition, resulting in the wipe out of AT1 bonds. While this move helped mitigate contagion risks, it stirred market nerves, as evidenced by tensions surrounding Deutsche Bank by month-end. Similar to the U.S., European financial institutions reassured stakeholders about the stability of the credit system, collaborating internationally to prevent any systemic issues. The second quarter stabilized, with slightly positive financial results in April, reassuring about the banking sector. Inflationary pressures later impacted the markets, but the tech sector remained resilient. Despite some economic data falling below expectations, the first semester concluded with positive market performances. Although the third quarter began on a positive note, thanks to encouraging news from the U.S., Europe exhibited signs of weakness. Global tensions and the strict stance of central banks led to market corrections in the summer, resulting in negative performances in September. The fourth quarter successfully navigated autumn challenges, closing the year with positive performances. Economic growth and optimism about controlling inflation led to a strong rebound, supported by positive developments in macroeconomic data and optimism from expected accommodative monetary policies.

MARKET OUTLOOK

2023 ended with a furious rally in the bond market, following the central banks' paradigm shift, certifying the end of an unprecedented tightening cycle. For 2024, we can reasonably expect a sideways and volatile phase in the early quarters, with an economic cycle yet to normalize. After the summer, in tandem with the central banks' easing path, a favorable second half of the year for the bond market is anticipated. The market may have become somewhat overly optimistic about the rate cut trajectory, but from a medium-term perspective, timing seems less relevant; it's the direction that matters. In the first part of the year, carry will dominate, thanks to current yields in Europe not seen in almost a decade. In the second half, where we ideally foresee the beginning of rate cuts, we expect a healthy bullish steepening of the year, we believe the normalization trend should be accompanied, buoyed by still significant yields in the Corporate Investment Grade and Financial Senior segments. As the rate-cutting process begins and a bullish steepening movement towards a more "normal" curve shape takes form, the true spread sector will be the primary beneficiary. In this context, emerging market bonds and High Yield may outperform. Excluding disruptive external events or occasional spot volatility episodes, the trio of high carry, curve rollover with declining rates, and potential further spread compression represents the best recipe for a positive 2024 for the bond market.

FUND REVIEW

In 2023, the Kairos International Sicav - Bond Portfolio maintained a low-risk profile with high liquidity. During the first quarter, the strategy focused on high-quality short-term Investment Grade issues and reducing exposure to High Yield. Investments in the senior financial sector were increased, prioritizing high-quality bonds in the corporate senior unsecured category. The overall duration was reduced, closing just above one year. In the second quarter, targeted adjustments were made to the portfolio, choosing short-term Investment Grade issues. Allocation in the senior financial sector was increased, reducing in corporate senior unsecured. Afterward, the duration was reduced to just over a year, emphasizing short term Investment Grade issues, particularly in the corporate senior unsecured sector. Afterward, proactive measures were taken in the portfolio by reinvesting in securities with durations spanning two to five years. During October, the focus shifted to high-quality Investment Grade issues with maturities up to 5 years, preferring the senior financial segment and reducing exposure to short-term corporate senior unsecured. Then we selectively participated in the primary market, with a primary focus on attractive risk/return profiles within the senior financial sector. After the Federal Reserve meeting in November, the duration was actively increased through Corporate Investment Grade issues with maturities up to 5 years, particularly in senior financial and corporate High Yield issuances with appealing risk/return profiles, reducing on Investment Grade corporate and senior financial sector and senior financial and corporate High Yield issuances with appealing risk/return profiles, reducing on Investment Grade corporate and senior financials were reduced, capitalizing on profit opportunities in issues that had become expensive. The portfolio duration closed around 2 years, at the year's highest levels.

Kairos International Sicav - Target 2026

MARKET REVIEW

In 2023, despite the challenges faced by global financial markets, they exhibited robust resilience, concluding the year in positive territory. The first quarter started positively with good news from the U.S., China's opened after Covid, the slowdown of the inflation and positive macro data. However March proved to be a challenging month. The closures of two U.S. banks, Silicon Valley Bank and Signature Bank, prompted intervention from U.S. authorities to safeguard deposits. Credit Suisse received a lifeline through UBS acquisition, resulting in the wipe out of AT1 bonds. While this move helped mitigate contagion risks, it stirred market nerves, as evidenced by tensions surrounding Deutsche Bank by month-end. Similar to the U.S., European financial institutions reassured stakeholders about the stability of the credit system, collaborating internationally to prevent any systemic issues. In this context, emerging market bonds and High Yield may outperform. Excluding disruptive external events or occasional spot volatility episodes, the trio of high carry, curve rollover with declining rates, and potential further spread compression represents the best recipe for a positive 2024 for the bond market.

FUND REVIEW

The portfolio follows the principles of high diversification and low concentration, and investments are made in liquid instruments within the fixed income universe such as government, corporate and financial bonds, with a top-down approach. This approach follows rigorous bottom-up fundamental analysis, both on the issuer and on individual issues. The investment universe is global, with a particular focus on European corporate and government issuers. During the early months of the year we put in place specific adjustments increasing exposure to Financial Seniors and Corporate HY. We participated selectively to the primary market, focusing on Financials Seniors and Corporate IG new issuances. In the second part of the year, the activity was relatively limited, maintaining a stable portfolio structure. Towards the end of the year, to best leverage the shift in economic policy paradigm with the abrupt repricing of curves, exposure to Financials and Corporate HY was once again increased. These purchases were funded by taking profits on the Corporate Investment IG segment, which had become overly expensive due to the violent compression of spreads.

In this context, emerging market bonds and High Yield may outperform. Excluding disruptive external events or occasional spot volatility episodes, the trio of high carry, curve rollover with declining rates, and potential further spread compression represents the best recipe for a positive 2024 for the bond market.

FUND REVIEW

In 2023, the Kairos International Sicav - Bond Plus was managed with a diversified and highly liquid approach, adapting strategies to the market environment. During the first quarter, exposure was increased in both the High Yield and Investment Grade segments, preferring short-term issues up to 7 years with a cautious approach. We preferred financials senior, AT1, and corporate subordinated, accompanied by a synthetic structure to mitigate volatility. Afterward, we reduced the weight on short-term Investment Grade issues, to balance the portfolio risk. The duration was managed dynamically, especially during the financial sector tensions in March triggered by the Credit Suisse earthquake, resulting in a reduction of exposure to financial subordinates and High Yield. We followed an active approach focused on higher-quality issues, tactically increasing the weight of senior secured and corporate IG segments. The synthetic structure we put in place previously, allowed the active management during the turbulent market conditions. In the second quarter, exposure on short term to 5-year Investment Grade issues increased, with a reduction in High Yield weight. The financials senior and Financial Lower Tier 2 components were increased. Later on, exposure to Corporate senior unsecured issues, especially ESGrelated, was increased, taking advantage of a robust primary market. The portfolio duration increased, reaching the annual highs. At the beginning of the third quarter, the Fund benefited from spread compression due to the positioning in high-quality bonds, with minimal exposure to High Yield. Then, new issuances were participated in, focusing on the longer end of the government curve and Financial Senior segment. The Corporate Hybrids component was increased, along with the exposure to the High Yield segment. During the last part of the year, we put in place active strategies were in October, we reduced the overall duration, preferring short-term issues. Exposure to Corporate subordinated and AT1 was increased, while the weight on Financials Senior and Corporate Senior Unsecured was reduced. The portfolio duration decreased to 3.1 years. We participated to the primary market, on financial seniors with maturities of 7-10 years and high coupon AT1. After the November Federal Reserve meeting, the duration was actively increased, funding purchases by reducing less attractive components. During the final part of the year, we increased on financial seniors with a focus on green issuances and a duration of 5 years, along with emerging markets and Corporate High Yield. The portfolio duration closed around 3.2 years, with a reduction of the tactical overlay on the US curve and coverage on BTP to address potential volatility related to MES tensions, creating a liquidity buffer for the new year.

Excluding disruptive external events or occasional spot volatility episodes, the trio of high carry, curve rollover with declining rates, and potential further spread compression represents the best recipe for a positive 2024 for the bond market.

FUND REVIEW

The Fund has followed its investment objective, incorporating ESG factors in the selection process. During the early months of the year, the activity was relatively limited, maintaining a stable portfolio structure. In March, we put in place specific adjustments, lowering financial senior and corporate senior unsecured issues. Afterwards, the exposure to short-term Corporate senior unsecured and secured was further reduced, while increasing investments in high-quality, long-term financial senior bond with Investment Grade rating and not exceeding 5 years. The weight in the insurance sector was marginally increased, and we participated selectively to the primary market. Finally, on the Investment Grade segment, we decrease short-term and up to 5 years duration issues, preferring longer maturities, from 5 to 7 years, at the same time the weight of the High Yield segment was increased with short-term Financial Senior issues. The Fund was closed at the end of October.

FUND REVIEW

The Fund followed the investment objective of capital protection by investing in US bonds. During the year, marginal interventions were carried out in exposures, leaving the portfolio structure almost unchanged. Exposure was weighted primarily to US government bonds, where approximately one fifth of the Portfolio was exposed to Investment Grade corporate bonds with maturities of up to 5 years. The Fund was closed at the end of October.

Inflationary pressures later impacted the markets, but the tech sector remained resilient. Despite some economic data falling below expectations, the first semester concluded with positive market performances. Although the third quarter began on a positive note, thanks to encouraging news from the U.S., Europe exhibited signs of weakness. Global tensions and the strict stance of central banks led to market corrections in the summer, resulting in negative performances in September. The fourth quarter successfully navigated autumn challenges, closing the year with positive performances. Economic growth and optimism about controlling inflation led to a strong rebound, supported by positive developments in macroeconomic data and optimism from expected accommodative monetary policies.

MARKET OUTLOOK

2023 ended with a furious rally in the bond market, following the central banks' paradigm shift, certifying the end of an unprecedented tightening cycle. For 2024, we can reasonably expect a sideways and volatile phase in the early quarters, with an economic cycle yet to normalize. After the summer, in tandem with the central banks' easing path, a favorable second half of the year for the bond market is anticipated. The market may have become somewhat overly optimistic about the rate cut trajectory, but from a medium-term perspective, timing seems less relevant; it's the direction that matters. In the first part of the year, carry will dominate, thanks to current yields in Europe not seen in almost a decade. In the second half, where we ideally foresee the beginning of rate cuts, we expect a healthy bullish steepening of the year, we believe the normalization trend should be accompanied, buoyed by still significant yields in the Corporate Investment Grade and Financial Senior segments. As the rate-cutting process begins and a bullish steepening movement towards a more "normal" curve shape takes form, the true spread sector will be the primary beneficiary. In this context, emerging market bonds and High Yield may outperform. Excluding disruptive external events or occasional spot volatility episodes, the trio of high carry, curve rollover with declining rates, and potential further spread compression represents the best recipe for a positive 2024 for the bond market.

FUND REVIEW

During 2023, portfolio liquidity was actively managed, calibrating the weight of the various asset classes according to market dynamics. During the first semester, we proceeded with a constant rebalancing, adjusting the weight of the asset classes to their respective pivotal weights in line with market dynamics. The duration remained stable around 3.4 years. In the second part of the year, the approach remained consistent in portfolio management. Actions were taken on single portfolio exposures, rebalancing the asset classes to their pivotal weights taking profit from on themes that outperformed. The position in government bonds was actively managed. The portfolio's duration decreased during the last months, and closed at around 2.8 years.

Kairos International Sicav - Financial Income

MARKET REVIEW

In 2023, despite the challenges faced by global financial markets, they exhibited robust resilience, concluding the year in positive territory. The first quarter started positively with good news from the U.S., China's opened after Covid, the slowdown of the inflation and positive macro data. However March proved to be a challenging month. The closures of two U.S. banks, Silicon Valley Bank and Signature Bank, prompted intervention from U.S. authorities to safeguard deposits. Credit Suisse received a lifeline through UBS acquisition, resulting in the wipe out of AT1 bonds. While this move helped mitigate contagion risks, it stirred market nerves, as evidenced by tensions surrounding Deutsche Bank by month-end. Similar to the U.S., European financial institutions reassured stakeholders about the stability of the credit system, collaborating internationally to prevent any systemic issues. The second quarter stabilized, with slightly positive financial results in April, reassuring about the banking sector. Inflationary pressures later impacted the markets, but the tech sector remained resilient. Despite some economic data falling below expectations, the first semester concluded with positive market performances. Although the third quarter began on a positive note, thanks to encouraging news from the U.S., Europe exhibited signs of weakness. Global tensions and the strict stance of central banks led to market corrections in the summer, resulting in negative performances in September. The fourth quarter successfully navigated autumn challenges, closing the year with positive performances. Economic growth and optimism about controlling inflation led to a strong rebound, supported by positive developments in macroeconomic data and optimism from expected accommodative monetary policies.

Excluding disruptive external events or occasional spot volatility episodes, the trio of high carry, curve rollover with declining rates, and potential further spread compression represents the best recipe for a positive 2024 for the bond market.

FUND REVIEW

Throughout 2023, Kairos International Sicav - Financial Income managed the portfolio carefully, with active strategies and adapting to market conditions quarter after quarter. In the first part of the year, the focus was on optimizing the portfolio. The weight of AT1 instruments was reduced to below 60%, reaching the lowest levels in recent months. We preferred high-quality Investment Grade issues with short term to 5 years. March was challenging, particularly for AT1 securities, due to tensions in the financial sector. The month can be summarized in two distinct phases: pre and post intervention on Credit Suisse. During the initial phase, portfolio operations involved normal fine-tuning and switching positions based on relative value assessments, without significant changes to the strategy. We participate selectively to the primary market. Afterward, with the surge in volatility and risk premiums, we reduced the subordinated component but not the national champions and we catch the opportunities on the senior secured as to align the portfolio with the evolving market conditions. During the second quarter, we maintained a cautious approach preferring short-term issues. The weight of AT1 instruments remained stable, but we increased the exposure to Investment Grade subordinated securities with maturities between 5 and 10 years. On the third guarter, the Fund faced a volatile market, and the portfolio was actively managed. Emphasis was placed on the High Yield sector, while adjustments were made on Financial Senior and Lower Tier 2 issues. In the last months, the weight of AT1 instruments was steadily increased, reaching the maximum for the year at 69%. In October, the allocation to Investment Grade AT1 instruments with short-term maturities was increased, reducing exposure to Lower Tier 2 instruments. During the last months, in a favorable context characterized by a decrease in interest rate volatility, the weight of the AT1 component was maintained at 69%, but with significant changes in its composition. The portion of AT1 with short-term calls was reduced (almost zeroed out by the end of the period) in favor of instruments with intermediate calls, new AT1 issues with high coupons in the primary market, and low-cash price, high-beta AT1s with long-term calls. Simultaneously, exposure to the Tier 2 and Senior sectors was increased, funding the purchases by taking profits on senior issues that had become very compressed. Exposure to Italy was restored, after rating agency reviews. Finally, in December, with the weight of the AT1 component maintained at 69%, attention shifted to optimizing the portfolio, further reducing short-term AT1 issues in favor of instruments with medium to long-term calls and more attractive risk-return profiles, especially from the European periphery. The portfolio's duration closed around 3.2 years.

Kairos International Sicav - European Long Only

MARKET REVIEW

2023 was exactly the opposite of what 2022 has offered with a strong short squeeze started straight away in the month of January and continued over the year in different phases.

Most investors started the year with an extreme pessimism and underweight and as the year continued their had to rebalance their portfolios leading in the last 3 months of the year to one of the biggest bounces we had in the recent years.

The main topic has been the inflation and the reaction of the central banks with the market betting at the end of 2023 on potential 6 cuts by the Fed and ECB.

You had to act as a contrarian to do well in 2023 and it was not as easy as it seemed looking at the performance as one of the main topic, the potential recession coming from the highest inflation in 50 years didn't really showed up with the soft landing rhetoric as winner.

MARKET OUTLOOK

The Central banks have successfully managed to keep under control the inflation and we will witness in 2024 to some rate cuts but the market seems to price the perfection now as positioning/sentiment is very euphoric, and investors are possibly even too confident about the health of the corporate/consumers.

While it is extremely positive that the market has gone back to functional with the return of M&A and Ipo after 3 years of very poor activity, we should expect more volatility during the year as lending standards are still tight and earnings might differentiate more than what we have seen in the past between good and bad companies.

The market might also get surprised by some potential downturn in the economy as the hard lending scenario is not priced in.

FUND REVIEW

The Fund generated an annual performance of +11.22% (Class P - EUR). Best contributors across sectors have been in Industrials and Technology while the negatives were only two, Healthcare and Communications.

Best contributors on a single name basis have been ASML, Safran and LSE while among the losers Bayer, Tenaris and Prosus.

Investment Manager's Report

Kairos International Sicav - New Era ESG*

MARKET REVIEW

2023 will be recorded as the Year of AI aka Artificial Intelligence. Because of that reason Technology as a sector did remarkably well recovery through the year reverting the tough 2022 performance.

Despite the Macro concerns not easing, adding a new conflicts in the Middle East amid persisting geo political tensions between China and USA and between Europe and Russia, financial markets have been anticipating during the course of the Year the end of restrictive monetary policies by the major central Banks: from the Fed to the ECB we assisted to a more balanced set of comments and actions with regard to curb inflation.

In this context sectors which did suffer in 2022 started to recover in 2023.

With reference to the Kairos International Sicav - New Era ESG the Fund started to recover due to its thematic mix made of Semiconductor, Software, Semicapital Equipment makers, Internet Platform, etc all sectors known to be exposed not only to the Growthy portion of the market but also exposed to the emerging AI revolution.

As a result as of October 19th 2023 last date in which the Kairos International Sicav - New Era ESG has been managed and run before closing and merging into a new vehicle, the YTD performance was positive +16.66% vs Benchmark +8.20%.

Looking in retrospective Communications has been the best contributor sector +10.06% topping Technology up 8.33% while Health Care -1.16% has been the laggard sector.

In terms of specific contributor Meta Platforms up 4.53% has been the best performing name till the date of the closing of the Fund the 19th October while GitLab -0.43% has been the most dilutive for the Fund.

Kairos International Sicav - Italia

MARKET REVIEW

Despite several challenges and some degree of volatility, 2023 proved to be a strong year with most of financial markets closing with positive performances. As for the Italian market specifically, 2023 was marked by a huge outperformance of large caps mainly driven by banks, as a result of higher interest rates and low deposit betas expanding their net interest incomes, whilst mid and small caps lagged behind mainly because of macro uncertainty and a tough economic environment. Even though the year started with positive news coming from China's reopening and definitive end of its zero-Covid policy, in the end the Chinese economy turned out to be weaker and less resilient than expectations. In March the failure of two US regional banks (the Silicon Valley Bank and the Signature Bank) and the acquisition of Credit Suisse by UBS triggered some short-term volatility across both equity and bond markets, which was then reabsorbed later during the year. The price of oil and gas slightly increased in the fourth quarter (though always remaining well below peak levels reached in 2022) on the back of the sudden outbreak of the Israel-Hamas conflict. As for monetary policy, during the first part of 2023 both the Federal Reserve and the European Central Bank kept increasing their policy rates: the former increased US policy rates by +100bps to 5.50%, the latter raised EU policy rates by +200bps to 4.5%. Instead, during the second half of the year both central banks paused their hawkish stance to carefully monitor inflation dynamics and make any further policy intervention only if needed: therefore, in 2023 both US and European inflation kept decreasing and normalizing towards a more sustainable level.

MARKET OUTLOOK

During 2024 inflation and interest rates will remain the two key macroeconomic variables to look at. As we write, the market is expecting the Federal Reserve to keep rates unchanged during the first months of the year and then to start cutting them in the second half of 2024 (if not earlier), as a result of a consistent and prolonged reduction in inflation levels. The beginning of a monetary expansionary cycle should improve the visibility on the economic cycle and positively impact both corporate results and 2024 outlooks for companies, which in 2023 suffered from concerns around an incoming recession. The portfolio retains its preference for high quality and defensive names, whilst remaining underweight cyclical and value ones. The positioning within the banking sector remains highly selective and focused on sectoral consolidation opportunities which might arise during the year. As for Italy, Giorgia Meloni's Government gained the 2024 Budget Law approval and keeps working to respect the milestones required to get the NRRP (National Recovery and Resilience Plan) funding from the European Union.

FUND REVIEW

Kairos International Sicav - Italia actively managed its portfolio positions during 2023, both on single names and on the derivatives structure. While the year started with an increase of portfolio exposure, at the end of February we began to decrease net equity. The quarter ended with a sharp increase in volatility, faced by considerably reducing the net equity exposure, which came close to the lows of the year: afterward, with the stabilization of the market, it was progressively increased. We also intervened in the single portfolio positions, trying to take advantage of market progresses. Thereafter, we continued with a net equity exposure above the average for the year, maintaining a preference for banking stocks, and reducing utilities and telecommunications, and preferring companies active in the IT, healthcare and materials sectors. During the second half, we continued to actively manage the net equity exposure, trying to optimize the portfolio's performance while maintaining a volatility lower than the market. Net equity exposure was gradually reduced, taking partial profits on utilities and consumer staples whilst increasing financials and energy. In September, with a volatile market, we protected the portfolio through derivatives and took profit by reducing exposure to financials and utilities. During the last months, while the portfolio structure remained unchanged, we preferred to reduce exposure to financials, decreasing the weight in the banking sector, and industrials, while increasing the weight in utilities, focusing on large national players. The portfolio closes the year weighed on large caps active in the financial sector, where large national banks are preferred, on consumer discretionary and utilities. The Fund closed the year with a positive performance, where the best sectors were financials, consumer discretionary and utilities, while consumer staples closed negatively. The top positive contributors were Unicredit, Enel and Stellantis, while the worst contributors were Italian Wine Bran

Kairos International Sicav - Made in Italy

MARKET REVIEW

Despite several challenges and some degree of volatility, 2023 proved to be a strong year with most of financial markets closing with positive performances. As for Italy, Giorgia Meloni's Government gained the 2024 Budget Law approval and keeps working to respect the milestones required to get the NRRP (National Recovery and Resilience Plan) funding from the European Union.

FUND REVIEW

During the first part of the year, the allocation to blue-chip stocks fluctuated between 45% and 49%, reaching its peak at the end of June. Simultaneously, exposure to mid and small caps increased from 41% to 47%. By the conclusion of the first semester, the large-cap side was weighted primarily on financials, utilities, and industrials; while exposure to companies not listed on the FTSEMIB included IT, industrials, and consumer discretionary.

The bond allocation decreased to 1% of the portfolio, primarily tied to financials, utilities, and consumer discretionary sectors. Moving into the second half of the year, exposure to blue-chip stocks remained stable, tilted towards financials, utilities, and consumer discretionary. Exposure to companies outside the FTSEMIB closed the year above the average, around 57%, focused mainly on IT, industrials, and consumer discretionary. Bonds weighted 2% of the portfolio, mainly exposed to telecommunications, utilities, and consumer discretionary names. The Fund recorded a positive performance yearly, driven by strength in financials, consumer discretionary, and utilities. Conversely, healthcare and consumer staples recorded negative performances. Top contributors included Unicredit, Enel, and IntesaSanpaolo, while CNH Industrial, Italian Wine Brand, and Antares Vision faced challenges. As for the bond component, the year closed with a positive performance too.

Kairos International Sicav - ActivESG

MARKET REVIEW

In 2023, global markets experienced a positive trajectory, characterized by decelerating inflation and the consequent anticipation of a less stringent monetary policy by Central Banks. Although economic growth slowed, it proved to be more resilient than initially expected. Notably, companies reported generally strong earnings throughout the year.

Market performance followed a relatively stable trajectory over the year. In bullish markets, the US outpaced Europe, driven by the technology sector and the artificial intelligence investment theme (S&P 500 +24.23% and Nasdaq +43.42% compared to Stoxx600 TR +15.80%). In Europe: DAX +20.31%, CAC40 +16.52%, FTSE100 +5.99%, IBEX +22.76%, and FTSEMIB +28.03%. Developed markets outperformed emerging markets, which were negatively impacted primarily by China (MSCI China -13.31%).

MARKET OUTLOOK

Investors are increasingly anticipating a rate cut by the Fed in March (OIS currently price in a total cut of 150 basis points by the end of 2024). We will have to wait and see whether this expectation materializes, but it certainly signals a departure from the trend of the past two years. While we are more optimistic about inflation, the outlook for growth remains uncertain. Market sentiment still leans towards the possibility of a mild or severe recession in the global economy, as indicated by the inverted yield curves of German and American government bonds, which also suggests potential challenges for companies. The delicate balance between inflation and growth will heavily influence stock prices in the coming year.

The situations in Ukraine and Israel are ongoing concerns that require close monitoring, as they have the potential to cause volatility in both markets and commodities.

Regarding ESG (Environmental, Social, and Governance) considerations, the 28th United Nations Climate Change Conference (COP 28) in Dubai recently approved a historic agreement aiming to transition away from fossil fuels. This agreement emphasizes accelerating action in this decade to achieve net-zero emissions by 2050, though it notably omits the term "phasing-out" demanded by more ambitious countries but rejected by hydrocarbon-producing nations.

We continue to anticipate that sustainable investments will become mainstream within a decade or even sooner. This growth will be propelled by both regulation and the increasing willingness of clients to invest in sustainable Funds.

FUND REVIEW

Kairos International Sicav - ActivESG is Kairos' solution based on an ESG long/short strategy focused on medium and large European equities. The Fund transitioned to Article 9 of Regulation (EU) 2019/2088 during the year, ensuring at least 80% of its gross exposure is invested in sustainable investments as outlined in the regulation. A sustainable investment is defined as an investment in an economic activity that contributes to an environmental or social objective, provided it does not cause significant harm to any environmental or social objective, and the beneficiary company follows good governance practices. The Fund concluded 2023 with a positive performance of +13.24% (class P). Throughout the period, net and gross exposure ranged between 40-80% and 100-

The Fund concluded 2023 with a positive performance of +13.24% (class P). Throughout the period, net and gross exposure ranged between 40-80% and 100-160% respectively. In terms of individual stocks, key positive contributors stemmed from long positions in ASML, Novo Nordisk, Tui, and Faurecia. Notable negative contributors included short positions in Pandora, Carnival, and BE Semiconductor Industries. Additionally, the Fund did not hedge currency exposure, which further contributed positively to its overall performance.

Kairos International Sicav - European Long/Short

MARKET REVIEW

2023 was exactly the opposite of what 2022 has offered with a strong short squeeze started straight away in the month of January and continued over the year in different phases.

Most investors started the year with an extreme pessimism and underweight and as the year continued their had to rebalance their portfolios leading in the last 3 months of the year to one of the biggest bounces we had in the recent years.

The main topic has been the inflation and the reaction of the central banks with the market betting at the end of 2023 on potential 6 cuts by the Fed and ECB.

You had to act as a contrarian to do well in 2023 and it was not as easy as it seemed looking at the performance as one of the main topic, the potential recession coming from the highest inflation in 50 years didn't really showed up with the soft landing rhetoric as winner.

MARKET OUTLOOK

The Central banks have successfully managed to keep under control the inflation and we will witness in 2024 to some rate cuts but the market seems to price the perfection now as positioning/sentiment is very euphoric, and investors are possibly even too confident about the health of the corporate/consumers.

While it is extremely positive that the market has gone back to functional with the return of M&A and Ipo after 3 years of very poor activity, we should expect more volatility during the year as lending standards are still tight and earnings might differentiate more than what we have seen in the past between good and bad companies.

The market might also get surprised by some potential downturn in the economy as the hard lending scenario is not priced in.

FUND REVIEW

The Fund closed the year with a positive performance of +7.63% (Class P - EUR) very close to the high watermark. Best contributors across sectors have been Industrials and Consumer Discretionary while the negatives were Communications and Consumer Staples.

The net equity exposure at the end of 2023 amounted to 38% circa while the gross equity exposure amounted to 100%, the Fund has been moving the net/gross extensively during the year in order to achieve a positive performance obtained with a much lower volatility than the market.

Kairos International Sicav - Patriot

MARKET REVIEW

Despite several challenges and some degree of volatility, 2023 proved to be a strong year with most of financial markets closing with positive performances. As for the Italian market specifically, 2023 was marked by a huge outperformance of large caps mainly driven by banks, as a result of higher interest rates and low deposit betas expanding their net interest incomes, whilst mid and small caps lagged behind mainly because of macro uncertainty and a tough economic environment. Even though the year started with positive news coming from China's reopening and definitive end of its zero-Covid policy, in the end the Chinese economy turned out to be weaker and less resilient than expectations. In March the failure of two US regional banks (the Silicon Valley Bank and the Signature Bank) and the acquisition of Credit Suisse by UBS triggered some short-term volatility across both equity and bond markets, which was then reabsorbed later during the year. The price of oil and gas slightly increased in the fourth quarter (though always remaining well below peak levels reached in 2022) on the back of the sudden outbreak of the Israel-Hamas conflict. As for monetary policy, during the first part of 2023 both the Federal Reserve and the European Central Bank kept increasing their policy rates: the former increased US policy rates by +100bps to 5.50%, the latter raised EU policy rates by +200bps to 4.5%. Instead, during the second half of the year both central banks paused their hawkish stance to carefully monitor inflation dynamics and make any further policy intervention only if needed: therefore, in 2023 both US and European inflation kept decreasing and normalizing towards a more sustainable level.

MARKET OUTLOOK

During 2024 inflation and interest rates will remain the two key macroeconomic variables to look at. As we write, the market is expecting the Federal Reserve to keep rates unchanged during the first months of the year and then to start cutting them in the second half of 2024 (if not earlier), as a result of a consistent and prolonged reduction in inflation levels. The beginning of a monetary expansionary cycle should improve the visibility on the economic cycle and positively impact both corporate results and 2024 outlooks for companies, which in 2023 suffered from concerns around an incoming recession. The portfolio retains its preference for high quality and defensive names, whilst remaining underweight cyclical and value ones. The positioning within the banking sector remains highly selective and focused on sectoral consolidation opportunities which might arise during the year. As for Italy, Giorgia Meloni's Government gained the 2024 Budget Law approval and keeps working to respect the milestones required to get the NRRP (National Recovery and Resilience Plan) funding from the European Union.

FUND REVIEW

During 2023, we actively managed the portfolio exposure, as well as the net equity one, implementing a dynamic approach thanks to the derivatives structure, which played a crucial role in helping the Fund to dynamically face the evolution of the market, maintaining limited volatility.

In the first quarter we increased financial, consumer and telecommunications, while reducing industrials, materials and health care. By the end of the quarter, to capitalize on the market's normalization after a phase of high volatility, we progressively closed the derivatives structure in order catch up the market rebound.

In the second quarter, the net equity exposure remained above the annual average. We reopened the derivatives structure which contributed to maintaining limited volatility. We actively managed single positions preferring industrial, financial, IT and health care sectors, whilst reducing exposure to telecommunications and consumer staples.

During the summer period, we gradually reduced net equity exposure, adopting a more cautious strategy. We increased on materials, industrials, and health care, reducing on financials, luxury and telecommunications.

In the last quarter, Kairos International Sicav - Patriot maintained an equity exposure below its annual average, adopting a prudent strategy. In December, the weight in the information technology, energy and telecommunications sectors increased, with a reduction in the industrial sector. Additionally, thanks to the derivatives structure within the portfolio, the net equity exposure was increased, although it remained below the 2023 average. The main portfolio exposures were on technological, industrial and financial sectors. Analyzing the performance of the Fund, the best performer were industrials, technology, and financials, and only Consumeer Staples ended flat. The top positive contributors were Cloudia Research, Intek Group and Saes Getters, while the worst contributors were GPI, Italian Wine Brand e Pasquarelli Auto.

Kairos International Sicav - KEY

MARKET REVIEW

Equity markets were overall positive in 2023. US outperformed Europe (S&P 500 +24.23% vs Stoxx600 Net return +15.8%).

Within the specific investment universe of the Sub-Fund and on a total return basis, utilities returned +13.61%, Infrastructure +14.39% with a significant volatility across the year mainly driven by the messages of the central banks.

MARKET OUTLOOK

The last two months of 2023 have seen a strong rebound in the markets and sectors belonging to our investment universe mainly following a verbal attitude of the central banks which has become less restrictive. Following this movement, and with the uncertainty about the landing of the cycle during 2024, the portfolio has gradually rotated towards idiosyncratic positions, both in terms of valuation and execution elements, while remaining with a net exposure in the medium-high end of the range historical. We enter the month of January 2024 with a net exposure of around 60% and with a partial reallocation from the utilities portfolio in favor of the telecom portfolio, where we see visible valuations and signs of a slowdown in both capex and competitive pressures. With respect to the utilities portfolio, we have observed weak wholesale electricity prices during the last part of 2023, mainly due to mild temperature, moderate demand, and high level of gas storage and this is an important swing factor for the sector earnings, especially IPPs and generators; integrated business models within the sector appear more protected in the short term because of the hedges offered by the retail portfolio.

FUND REVIEW

The Sub-Fund consolidated an annual performance of +11.95%.

In terms of performance attribution on annual basis, the long equity portfolio contributed with a positive performance of 14.64%, while the short portfolio, in a year of marked monthly volatility, contributed negatively by 1.79%. The average exposure during the year was 66%, varying from 35% to 90% in the reference period. All the sub-books of the Fund achieved a positive net result: Utilities +6%, Transport infrastructure 3.5%, Telecommunications infrastructure 2.2%, real estate c. 1%.

Kairos International Sicav - Emerging Markets*

MARKET REVIEW

2023 proved to be another volatile year for emerging markets with a massive divergence between the performance of its major market and the rest of the area. After an exceptionally challenging 2022, global equity indices started the new year with a very strong month and emerging markets were no exception. However, after the break for the Lunar New Year holidays, Chinese markets recorded a double-digit loss which dragged down the entire sector. In March, after a good recovery in the first week, emerging markets were hit by the volatility stemming from the US and European banking sectors in the central part of the month, before catching their breath in the last few days to end the month in positive territory. For the rest of the year, expectations of a widespread and sustainable recovery of the Chinese economy didn't materialize. Despite the robust recovery in consumer services, investment spending struggled to take off due to the difficulties that continued to afflict the real estate sector, weaker than expected exports and the lack of more determined stimulus action from the government. The rest of the emerging markets complex decoupled from China and delivered positive performance in line with developed markets.

MARKET OUTLOOK

The fate of emerging markets in 2024 will largely depend on two factors, the state of the Chinese economy and the monetary policy of the US Federal Reserve. Indeed, investors who have largely abandoned the Chinese stock market will monitor closely the actions of the policy makers in Beijing to judge their effectiveness to revitalize an economy before returning to invest in China. Moreover, the start of a cutting cycle by the Federal reserve which the market anticipates for the second quarter of 2024 will most likely favor the performance of assets in emerging markets.

FUND REVIEW

The Sub-Fund ended 2023 (the Sub-Fund was merged into another Sub-Fund in October) with a negative result both in absolute terms (-7.62% for Class P USD) and in relative terms (-2.67% for MSCI Emerging Markets Net Total Return Index). The structural bias towards Chinese equities was responsible for most of the loss.

Global risk exposure Method (unaudited)

All the Sub-Funds of Kairos International Sicav use the Commitment approach in order to monitor and measure the global exposure, except for the Sub-Funds Kairos International Sicav - Bond Plus and Kairos International Sicav - KEY using VAR Approach.

VaR approach

The global exposure of Kairos International Sicav - Bond Plus and Kairos International Sicav - KEY was calculated using the absolute VaR model approach (Historical, full revaluation of positions within each relevant Sub-Fund according to unilateral confidence interval 99%). VaR is calculated for a 1-day holding period and is converted in a 20-day variation using time scaling in accordance with the methodology set out in point 52 of CESR 10-788. The leverage for the above mentioned Sub-Funds was calculated as follows:

- using the Sum of Notional Approach (on a daily basis, according to the NAV calculation frequency) as laid down in the ESMA/CESR 10-788 guidelines.

- using the Commitment Approach (on a daily basis, according to the NAV calculation frequency) as laid down in the CSSF Circular 11/512.

The data presented in the table below are based on, at least, two observations per month.

Sub-Fund name	AVG VAR 1M 99%	MIN VAR 1M 99%	MAX VAR 1M 99%
Kairos International Sicav - Bond Plus	2.83%	2.40%	4.00%
Kairos International Sicav - KEY	7.15%	4.18%	9.06%

Leverage using the Sum of Notional Approach

Sub-Fund name	AVG of Leverage	MIN of Leverage	MAX of Leverage
Kairos International Sicav - Bond Plus	18.60%	0.00%	92.46%
Kairos International Sicav - KEY	33.29%	18.97%	75.37%

Leverage using the Commitment Approach

Sub-Fund name	AVG of Leverage	MIN of Leverage	MAX of Leverage
Kairos International Sicav - Bond Plus	3.27%	0.00%	15.18%
Kairos International Sicav - KEY	27.61%	15.16%	58.85%

Commitment approach

The remaining Sub-Funds of Kairos International Sicav use the Commitment approach in order to monitor and measure the global exposure.

The Board of Directors of the SICAV

To the Shareholders of Kairos International SICAV 60, avenue J. F. Kennedy L1855 Luxembourg Grand Duchy of Luxembourg

REPORT OF THE REVISEUR D'ENTREPRISES AGREE

Report on the audit of the financial statements

Opinion

We have audited the financial statements of Kairos International SICAV and each of its subfunds ("the Fund"), which comprise the statement of net assets, the securities portfolio and the financial derivative instruments as at 31 December 2023 and the statement of operations and changes in net assets for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of Kairos International SICAV and each of its sub-funds as at 31 December 2023, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

Basis for opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession ("Law of 23 July 2016") and with International Standards on Auditing ("ISAs") as adopted for Luxembourg by the Commission de Surveillance du Secteur Financier ("CSSF"). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the « Responsibilities of the "*réviseur d'entreprises agréé*" for the audit of the financial statements » section of our report. We are also independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants ("IESBA Code") as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements, and have fulfilled our other ethical responsibilities under those ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our report of the "réviseur d'entreprises agréé" thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report this fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Fund for the financial statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of these financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the "réviseur d'entreprises agréé" for the audit of the financial statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of the "réviseur d'entreprises agréé" that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund.

- Conclude on the appropriateness of the Board of Directors of the Fund's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report of the "réviseur d'entreprises agréé" to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report of the "réviseur d'entreprises agréé". However, future events or conditions may cause the Fund or any of its sub-funds to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Luxembourg, 22 April 2024

Notes to the Financial Statements as at December 31, 2023

Note 1. General information

KAIROS INTERNATIONAL SICAV (the "Fund") was incorporated on September 28, 2006 as a "société anonyme" under the laws of the Grand Duchy of Luxembourg and qualifies as an open-ended "société d'investissement à capital variable" with UCITS status. The Articles of Incorporation were published in the Mémorial of October 9, 2006. The Fund is authorised by the Luxembourg supervisory authority as a UCITS under Part I of the amended Law of December 17, 2010 relating to undertakings for collective investment.

As at December 31, 2023, the following Sub-Funds are open to investors:

- Kairos International Sicav - Bond

- Kairos International Sicav Target 2026
- Kairos International Sicav Bond Plus
- Kairos International Sicav Pentagon
- Kairos International Sicav Financial Income
- Kairos International Sicav European Long Only
- Kairos International Sicav Innovation Trends (launched on October 20, 2023)
- Kairos International Sicav Italia
- Kairos International Sicav Made in Italy
- Kairos International Sicav ActivESG
- Kairos International Sicav European Long/Short
- Kairos International Sicav Patriot
- Kairos International Sicav KEY

As at January 1, 2023, the Sub-Fund Kairos International Sicav - New Era ESG has changed its name in Kairos International Sicav - New Era.

Sub-Fund merged during the year

On October 20, 2023, Kairos International Sicav - USD Bond merged into Kairos International Sicav - Bond, based on the NAV date October 19, 2023.
 On October 20, 2023, Kairos International Sicav - Active Bond ESG merged into Kairos International Sicav - Bond Plus, based on the NAV date October 19, 2023.

- On October 20, 2023, Kairos International Sicav - New Era (formerly Kairos International Sicav - New Era ESG) merged into Kairos International Sicav - Innovation Trends, based on the NAV date October 19, 2023.

- On October 20, 2023, Kairos International Sicav - Climate Change ESG merged into Kairos International Sicav - Innovation Trends, based on the NAV date October 19, 2023.

- On October 20, 2023, Kairos International Sicav - Emerging Markets merged into Kairos International Sicav - Innovation Trends, based on the NAV date October 19, 2023.

Since September 1, 2014, the Board of Directors of the Fund has appointed Kairos Partners SGR S.p.A. to act as Management Company of the Fund. The Management Company is an incorporated company under Italian law of May 20, 1999 and controlled by Julius Baer Group Ltd.

Note 2. Fund's shares

The Board of Directors may decide to issue, within each Sub-Fund, separate Classes of Shares, whose assets will be commonly invested but where a specific structure, may be applied.

Each Sub-Fund may offer the following Classes of Shares:

- Class C Shares, which are available (i) to all investors in jurisdictions where the payment of commissions is prohibited, and/or (ii) to financial intermediaries who invest in their own name and on behalf of their clients within a fee-based asset management or advisory agreement, and/or (iii) to other investors as determined by the Management Company;

- Class D Shares, which are available through selected distributors;
- Class P Shares, which are available to all investors;

- Class S Shares, which can be subscribed only through selected distributors exclusively during the Initial Offer Period and will remain active for a limited time period. Class S shares can be issued in series differing by their Initial Offer Period (e.g. Class S1, S2, S3, etc.). The Initial Offer Period, the duration of the Share Class and the first Valuation Day will be defined in the application form, as of December 31, 2023 the Class S Shares is not launched;

- Class X and Y Shares, which are restricted to Institutional Investors that have entered into a separate agreement with a company within Kairos Group under which such investors have agreed on specific arrangements as to the payment of fees.

- Class Z Shares, which are available to both retail and Institutional Investors that have entered into a separate agreement with a company within Kairos Group under which such investors have agreed on specific arrangements as to the payment of fees, as of December 31, 2023 the Class Z Shares is not launched.

Note 3. Significant accounting policies

The financial statements are prepared on going concern basis and under Lux GAAP (Luxembourg Generally Accepted Accounting Principles) in accordance with legal and regulatory requirements in force in Luxembourg relating to Undertakings for Collective Investment and accounting principles generally accepted in Luxembourg.

The Fund's investments and other assets are valued on the basis of the latest available price prevailing on the valuation date which is December 29, 2023.

The NAV which has been used to prepare the financial statements is calculated on the basis of an unofficial NAV at the year date for the sole purposes of the financial statements.

3.1. Combined financial statements

The combined financial statements are expressed in EUR and are equal to the sum of the corresponding accounts in the financial statements of each Sub-Fund converted into euro at the exchange rate prevailing at the end of the financial year.

3.2. Foreign exchange conversions

The accounts of each Sub-Fund are denominated in the currency in which its net asset value is calculated.

The cost of investments denominated in currencies other than the Sub-Fund's accounting currency is converted into that currency at the exchange rate prevailing at the date of purchase.

Income and expenses in currencies other than the Sub-Fund's accounting currency are converted into that currency at the exchange rate prevailing at the transaction date.

At the end of the year, the investments' market value (determined as noted thereafter), the receivables, cash at banks and liabilities denominated in currencies other than the Sub-Fund's accounting currency are converted into that currency at the exchange rates prevailing at that date. The resulting realised foreign exchange gains or losses are included in the statement of operations and changes in net assets.

3.3. Valuation rules

1. The value of any cash in hand or on deposit, bills and demand notes and accounts receivable, prepaid expenses, cash dividends and interest declared or accrued as aforesaid and not yet received shall be deemed to be the full amount thereof, unless in any case the same is unlikely to be paid or received in full, in which case the value thereof shall be arrived at after making such discount as the Board of Directors may consider appropriate in such case to reflect the true value thereof;

2. The value of securities and/or financial derivative instruments which are listed or dealt in on any stock exchange shall be based, except as defined in the paragraph below, in respect of each security on the latest available dealing prices or the latest available mid market quotation (being the mid point between the latest quoted bid and offer prices) on the stock exchange which is normally the principal market for such security;

3. Where investments of the Fund are both listed on a stock exchange and dealt in by market makers outside the stock exchange, on which the investments are listed, then the Board of Directors will determine the principal market for the investments in question and they will be valued at the latest available price in that market;

4. Securities dealt in on another regulated market are valued in a manner as close as possible to that described in paragraph 2;

5. In the event that any of the securities held in the Fund's portfolio on the Valuation Day are not listed or dealt in on a stock exchange or another regulated market, or for any of such securities, no price quotation is available, or if the price as determined pursuant to sub-paragraphs 2) and/or 4) is not in the opinion of the Board of Directors representative of the fair market value of the relevant securities, the value of such securities shall be determined prudently and in good faith by the Board of Directors, based on the reasonably foreseeable sales price or any other appropriate valuation principles;

6. Units or Shares in underlying open-ended investment funds shall be valued at their last available net asset value reduced by any applicable charges;

7. Liquid assets and money market instruments are valued at their nominal value plus accrued interest or on an amortised cost basis;

8. In the event that the above mentioned calculation methods are inappropriate or misleading, the Board of Directors may adjust the value of any investment or allow some other method of valuation to be used for the assets of the Fund if it considers that the circumstances justify that such adjustment or other method of valuation should be adopted to reflect more fairly the value of such investments and is in accordance with accounting practice.

3.4. Profits and losses on sales of securities

Profits and losses on sales of securities are determined on an average cost basis.

Note 3. Significant accounting policies (continued)

3.5. Future contracts

Future contracts are valued based on the last available market price. Profits and losses realised and unrealised are included in the statement of operations and changes in net assets. For the calculation of net holdings by currency on financial instruments, the holdings are converted at the exchange rate prevailing at the end of the year.

3.6. Forward foreign exchange contracts

The forward foreign exchange contracts opened at the year-end are valued at the forward exchange rates corresponding to the termination date of the contract. The unrealised appreciation / (depreciation) are included in the Statement of Operations and Changes in Net Assets.

For the calculation of the net holdings by currency, the holdings are converted at the forward exchange rate corresponding to the termination date of the contract.

3.7. Options, Contracts for differences (CFD)

The financial derivative instruments (options, swap, contracts for difference ...) which are not listed on any official stock exchange or traded on any other organised market are valued in a reliable and verifiable manner on a daily basis and verified by a competent professional appointed by the Board of Directors of the Fund.

3.8. Dividends and interest

Dividends and interest received by the Fund on its investments are in many cases subject to irrecoverable withholding taxes at source. The value of any dividends and interest declared or accrued as aforesaid and not yet received is deemed to be the full amount thereof, unless in any case the same is unlikely to be paid or received in full.

3.9. Transaction costs

The transaction costs which are defined as: stamp duty, brokerage fees, stock exchange fees and VAT, are the costs included by the Fund in connection with purchases or sales of transferable securities, money market instruments, derivatives or other eligible assets.

Note 4. Investment management fees, performance fees and distribution fees

Management fee

No Management Fees are charged on the Net Asset Value of Class Z Shares. The Management Fees on Class Z Shares will be separately invoiced to investors based on a specific agreement with the Management Company, as of December 31, 2023 the Class Z Shares is not launched.

As of December 31, 2023 the Class S Shares is not launched

As of October 20, 2023, the management fees for Class Y of the Kairos International Sicav - ActivESG, Kairos International Sicav - KEY and Kairos International Sicav - European Long/Short sub-funds have been modified (see table below).

The Management Company will be paid a management fee calculated and accrued on each Valuation Day at such percentages (per annum) of the Net Asset Value of the relevant Class at the immediately preceding Valuation Day, plus subscriptions and minus redemptions received for the current Valuation Day, as disclosed below.

Note 4. Investment management fees, performance fees and distribution fees (continued)

Performance fees (continued)

Relative Method

The Performance Fee will be calculated on the difference – if positive – between the Gross Asset Value and the Reference Asset Value, being the Net Asset Value recorded on the most recent of (i) the last Valuation Day on which the Share Class paid a Performance Fee and (ii) the last Valuation Day of the fifth to last calendar year, or 100 Euros (or equivalent in the Share Class currency), if the Share Class existed for less than five years, calculated net of all costs and liabilities, taking into account any capital movements due to subscriptions, redemptions and dividend distributions and adjusted by the Benchmark evolution. On each Valuation Day, the accrual will be calculated as the difference between (i) the amount calculated in relation to the current Valuation Day and (ii) the result of the same calculation on the preceding Valuation Day, on the condition that any underperformance incurred during the performance reference period of the past 5 years has been recovered. The total amount accrued cannot be negative.

The amounts accrued during each calendar year are crystallised at the end of the year and paid within the thirtieth Business Day of the following year.

The past performance against the benchmark can be found in the KIID of the relevant Share Class.

Equalisation Method

The Performance fee will be calculated and accrued on each Valuation Day for each issued Share and fraction thereof on the difference - if positive - between the Gross Asset Value per Share and the high watermark, being the highest Net Asset Value per Share on the last day of any calendar year. The amounts accrued during each calendar year are crystallised and paid within the thirtieth Business Day of the following year. The amount reported in the Financial Statements includes the equalization amounts for Class X-Cap and N of the Sub-Funds Kairos International Sicav - KEY, Kairos International Sicav - Italia, Kairos International Sicav - ActivESG.

Kairos International Sicav - Italia

The total amount of performance fees paid to the Management Company is EUR 1,422,903.26. The difference concerns the "Equalisation Debit" (please refer to the Prospectus) paid by the Shareholders invested in the share classes with the Equalisation Method who redeemed the shares during the year. The performance fee due to the Management Company is not booked in the P&L of the Sub-Fund, but is booked through partial redemptions of shares in the respective share class.

Kairos International Sicav - ActivESG

The total amount of performance fees paid to the Management Company is EUR 296,690.78. The difference concerns the "Equalisation Debit" (please refer to the Prospectus) paid by the Shareholders invested in the share classes with the Equalisation Method who redeemed the shares during the year. The performance fee due to the Management Company is not booked in the P&L of the Sub-Fund, but is booked through partial redemptions of shares in the respective share class.

Kairos International Sicav - European Long / Short

The total amount of performance fees paid to the Management Company is EUR 1,838,928.13. The difference concerns the "Equalisation Debit" (please refer to the Prospectus) paid by the Shareholders invested in the share classes with the Equalisation Method who redeemed the shares during the year. The performance fee due to the Management Company is not booked in the P&L of the Sub-Fund, but is booked through partial redemptions of shares in the respective share class.

Kairos International Sicav - KEY

The total amount of performance fees paid to the Management Company is EUR 148,802.72. No "Equalisation Debit" (please refer to the Prospectus) paid by the Shareholders invested in the share classes with the Equalisation Method who redeemed the shares during the year.

Historical High Watermark Method

The Performance Fee will be calculated and accrued on each Valuation Day for each issued Share and fraction thereof on the difference – if positive – between the Gross Asset Value per Share and the historical high watermark, being the highest Net Asset Value per Share recorded on any preceding day since the first calculation date. Such difference, calculated net of all costs and liabilities, shall be considered gross of any dividend eventually paid during the same period.

The performance reference period equals the life of the Sub-Fund.

The amounts accrued are crystallised daily and paid within the thirtieth Business Day of each month.

Distribution fee

Class D Shares (except for Kairos International Sicav - Bond, Kairos International Sicav - Target 2026 and Kairos International Sicav - USD Bond*) pays a distribution fee of 0.25% of their Net Asset Value to the Management Company.

*See Note 1. General information

Note 5. Depositary, domiciliation and administration fees

The Depositary, the Domicile Agent and the Administrative Agent are entitled to receive the maximum fees provided for in the Prospectus and reimbursement for any reasonable out-of-pocket expenses incurred and chargeable to the Fund and fees for other services as agreed from time to time. The Domiciliary Agent, Registrar and Transfer Agent, shall each be entitled to receive an annual fee from the Fund pursuant to the relevant agreements between each of them and the Fund.

Note 6. Taxe d'abonnement

The Fund is not subject to taxation in Luxembourg on its income, profits or gains.

The Fund is not subject to net wealth tax in Luxembourg.

The Sub-Funds are, nevertheless, in principle, subject to a subscription tax (taxe d'abonnement) levied at the rate of 0.05% per annum based on their net asset value at the end of the relevant quarter, calculated and paid quarterly.

A reduced subscription tax rate of 0.01% per annum is however applicable to any Sub-Fund whose exclusive object is the collective investment in money market instruments, the placing of deposits with credit institutions, or both. A reduced subscription tax rate of 0.01% per annum is also applicable to any Sub-Fund or Share Class provided that their Shares are only held by one or more institutional investors within the meaning of article 174 of the Law of 2010 (an "Institutional Investor").

Note 14. Contingent Deferred Sales Charge ("CDSC")

A Contingent Deferred Sales Charge ("CDSC") may be deducted from the redemption proceeds in case of early redemption of some Sub-Funds, as detailed in Appendix I. The CDSC will be calculated on the net asset value of the Shares being redeemed paid to the relevant Sub-Fund.

When Shares of this Sub-Fund are redeemed before 31 December 2026, the redemption proceeds thereof will be subject to a Contingent Deferred Sales Charge ("CDSC") at the rates set forth in the table below.

Time of redemption	Rate
Up until 31 December 2022	1.00%
1 January 2023 - 31 December 2023	0.75%
January 2024 - 31 December 2024	0.50%
1 January 2025 - 31 December 2025	0.25%
1 January 2026 - 31 December 2026	0.00%

The CDSC will be calculated on the net asset value of the Shares being redeemed. The proceeds of the applicable CDSC are paid to the Sub-Fund.

Note 15. Merger

On July 31, 2023 the Board of Directors of the Company has resolved the following mergers:

-Merger of the Sub-Fund Kairos International Sicav - Active Bond ESG* into Kairos International Sicav - Bond Plus. -Merger of the Sub-Fund Kairos International Sicav - USD Bond* into Kairos International Sicav - Bond. -Merger of the Sub-Funds Kairos International Sicav - New Era*, Kairos International Sicav - Climate Change ESG* and Kairos International Sicav -Emerging Markets* into Kairos International Sicav - Innovation Trends*.

The Mergers were effective on October 20, 2023 (the "Merger Date")

The details of each merger presented in the tables below.

Merger of the Sub-Fund Kairos International Sicav - Active Bond ESG* into Kairos International Sicav - Bond Plus.

Note 16. SFDR disclosure

The information on the environmental and/or social characteristics for the sub-fund(s) disclosing under article 8(1) of SFDR as required by the article 50 (2) of SFDR RTS and/or the information on sustainable investments for the sub-fund(s) disclosing under article 9(1), 9(2) and 9(3) of SFDR as required by article 58 of the SFDR RTS are disclosed in the unaudited Additional information SFDR from page 132 to 207.

Note 17. Subsequent events

Amendment to the denomination and investment policy of Kairos International Sicav - European Long/Short

It has been approved by the Board of Directors of the Company to change the investment policy of Kairos International Sicav - European Long/Short to allow it to invest more widely and in a flexible manner outside of the European region. As a consequence, the denomination of the Sub-Fund is proposed to be changed into Kairos International Sicav - Opportunities Long/Short.

Kairos International Sicav - Target 2028

It has been approved by the Board of Directors of the Company to extend the offering period of the Sub-Fund until April 30, 2024 to allow to identify potential distributors (the initial offering period of the Sub-Fund Kairos International Sicav - Target 2028 will expire on January 31, 2024).

Merger of Kairos International Sicav - European Long Only into Kairos International Sicav - ActivESG

The Board of Directors of the Company has resolved to merge Kairos International Sicav - European Long Only (the "Merging Sub-Fund") into Kairos International Sicav - ActivESG (the "Receiving Sub-Fund") (hereafter the "Merger"). The Merger will be effective on April 5, 2024 (the "Merger Date").

Additional information (unaudited)

Remuneration policy

Directors' fees of EUR 44,500.00 are due to Massimo Paolo Gentili (Gentili & Partners). Directors' fees of EUR 45,256.33 are due to John Alldis - Director (Carne Group) and Roberto Rosso - Director did not receive any remuneration.

all figures are in EUR'000

Kairos Partners SGR S.p.A ("KPS") has drawn up a remuneration policy which is aimed at promoting a sound and effective risk management consistently with the risk profile and the regulations and prospectuses of the Funds it manages. The remuneration policy is in line with the business strategy, objectives, values and interests of KPS, the Funds it manages and the investors in the relevant Funds.

Remuneration for KPS staff may include, in addition to the fixed remuneration component, a variable remuneration component. The fixed remuneration component is set at a level which allows significant contractions of the variable remuneration payout. The variable remuneration component takes into proper account the risks generated for KPS and the Funds it manages, their results, those of the relevant business units and of the single individuals.

The remuneration policy is reviewed at least once a year and amended where necessary in order to ensure appropriateness and compliance with regulatory requirements.

There have been no material changes in the remuneration policy from the prior year.

SFT Regulation

Information according to Regulation (EU) 2015/2365 on the transparency of Securities Financing Transactions, and the re-use and amending Regulation (EU) No 648/2012 - Certificate in Section A.

During the year no securities financing transactions and total return swaps as defined in the above mentioned regulation occurred.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that	Did this financial product have a sustainable investment objective?
contributes to an environmental or social objective, provided that	Yes O X No
the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.	It made sustainable X It promoted Environmental/Social (E/S) investments with an environmental objective % Characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 3.50% of sustainable investments
The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852,	in economic activities that qualify as environmentally sustainable under the EU Taxonomy Sustainable under the EU Taxonomy
establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with	in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective
the Taxonomy or not.	It made sustainable investments It promoted E/S characteristics, but did not make any sustainable investments with a social objective %

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes environmental characteristics including air emission programs and it also considers the respect of the UNGC Principles and of the OECD Guidelines for Multinational Enterprises.

No benchmark has been identified for this Sub-Fund to attain such characteristics.

How did the sustainability indicators perform?

Sustainability

indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Characteristics promoted Data as at 31/12/2023 Indicator GHG Emissions (total scope 1+2 in 3860.09 Air emission programs tCO2eq) 146.02 GHG Intensity of investee companies (total scope 1+2 in tCO2eq) 96.99 **Carbon Footprint** Violations of UNGC Principles and 0 Respect of UNGC Principles OCD Guidelines for Multinational and OECD Guidelines Enterprises Lack of Processes and Compliance 28.49% Mechanisms

In addition, the Sub-Fund excluded some investments based on the following exclusion list:

• UN Global Compact;

1)Disclosure pursuant to Article 8 of the SFDR (continued) Kairos International Sicav - Target 2026 (continued)

- tobacco producers;
 - thermal coal, with a 25% revenue threshold from thermal coal mining and exploration and electricity generation;
- small arms, with a 10% revenue threshold;
- controversial weapons;
- predatory lending;
- EU High Risk Third countries, FATF high risk jurisdictions, countries under financial embargo, and countries with a severe risk rating.
- ... and compared to previous periods?

n/a, this is the first year of reporting on such indicators.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable. The Sub-Fund does not commit to invest in Sustainable Investments.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable. The Sub-Fund does not commit to invest in Sustainable Investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principle adverse impact indicators were considered by applying the strategies specified below:

• The following PAIs are integrated in the investment decision process: GHG Emissions (Total Scope 1 + 2 (tCO2eq), GHG Intensity of Investee Companies (Total Scope 1 + 2 (tCO2eq/EURm), Carbon footprint.

Concerning those indicators, in case of worsening or the occurrence of a negative event, the Management Company engages directly or collectively the issuer.

Where the situation does not improve and/or the issuer does not formally commit to improve it over a one-year period, the Management Company, taking into account the best interest of investors, may sell the position.

Principal adverse impacts are the most . significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

1)Disclosure pursuant to Article 8 of the SFDR (continued)

Kairos International Sicav - Target 2026 (continued)

Exclusion criteria:

 Violations of UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational enterprises, Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises;

The investment is considered eligible if the value of the indicators above is zero.

• Controversial Weapons.

The PAI listed above are monitored on a quarterly basis.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is

		2.05%	IRELAND

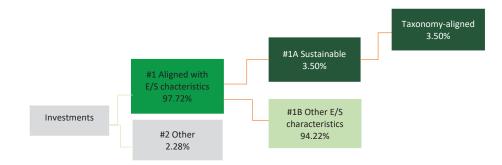

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. **For nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. • What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

1)Disclosure pursuant to Article 8 of the SFDR (continued) Kairos International Sicav - Target 2026 (continued)

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance. The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The asset allocation of the product is defined based on its investment strategy. As at 31 December 2023, **97.72%** of the assets were invested in investments aligned with the E/S characteristics promoted (#1).

In which economic sectors were the investments made?

Description	Average
Communications	7.79%
Consumer Discretionary	4.69%
Consumer Staples	2.87%
Energy	2.74%
Financials	44.80%
Government	1.15%
Health Care	1.78%
Industrials	10.71%
Materials	2.42%
Real Estate	2.40%
Technology	9.04%
Utilities	9.34%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

 Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

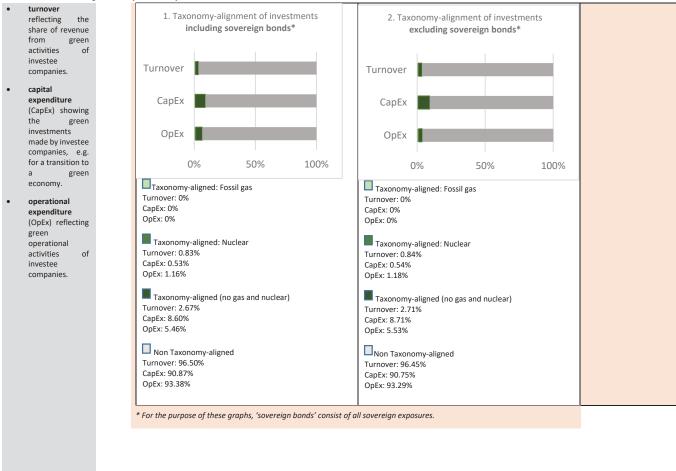

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

1)Disclosure pursuant to Article 8 of the SFDR (continued) Kairos International Sicav - Target 2026 (continued)

- What was the share of investments made in transitional and enabling activities? Not applicable.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods? Not applicable.

with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

are sustainable investments

> What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy? Not applicable.

What was the share of socially sustainable investments?

1)Disclosure pursuant to Article 8 of the SFDR (continued) Kairos International Sicav - Target 2026 (continued)

Not applicable

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "other" are 2.28% of the assets and consisted of cash and issuers not covered by the data provider. In such case, the minimum environmental or social safeguards cannot be guaranteed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the investments were made in compliance with the criteria described above and with the limits set forth in the investment policies of the Sub-Fund. The respect of such limits has been monitored by the relevant organizational units of the Management Company.

With regards to the engagement and voting activities, information can be found in the "Disclosure on the execution of engagement and voting policies".

How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance. **#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The asset allocation of the product is defined based on its investment strategy. As at 31 December 2023, **82.33%** of the assets were invested in investments aligned with the E/S characteristics promoted (#1).

• In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

 Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

1)Disclosure pursuant to Article 8 of the SFDR (continued) Kairos International Sicav - Bond Plus (continued)

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that do take into not account the criteria for environmentally sustainable economic activities under Regulation (EU) 202/852

- What was the share of investments made in transitional and enabling activities?
- Not applicable.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?
 Not applicable.

1)Disclosure pursuant to Article 8 of the SFDR (continued) Kairos International Sicav - Bond Plus (continued)

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "other" are 17.67% of the assets and include cash and issuers not covered by the data provider. In such case, the minimum environmental or social safeguards cannot be guaranteed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the investments were made in compliance with the criteria described above and with the limits set forth in the investment policies of the Sub-Fund. The respect of such limits has been monitored by the relevant organizational units of the Management Company.

With regards to the engagement and voting activities, information can be found in the "Disclosure on the execution of engagement and voting policies".

Reference

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

In addition, the Sub-Fund excluded some investments based on the following exclusion list:

- UN Global Compact;
- tobacco producers;
- thermal coal, with a 25% revenue threshold from thermal coal mining and exploration and electricity generation;
- small arms, with a 10% revenue threshold;
- controversial weapons;
- predatory lending;
- EU High Risk Third countries, FATF high risk jurisdictions, countries under financial embargo, and countries with a severe risk rating.
- ... and compared to previous periods?

n/a, this is the first year of reporting on such indicators.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable. The Sub-Fund does not commit to invest in Sustainable Investments.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable. The Sub-Fund does not commit to invest in Sustainable Investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principle adverse impact indicators were considered by applying the strategies specified below:

 The following PAIs are integrated in the investment decision process: GHG Emissions (Total Scope 1 + 2 (tCO2eq), GHG Intensity of Investee Companies (Total Scope 1 + 2 (tCO2eq/EURm), Emission to water, hazardous waste and radioactive waste ratio, Unadjusted Gender Pay Gap, Board Gender Diversity, GHG Intensity and Investee countries subject to social violations as specific indicators for securities issued by sovereigns and supranationals as well as the Violation of UN Global Compact Principles

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

1)Disclosure pursuant to Article 8 of the SFDR (continued) Kairos International Sicav - Active Bond ESG (continued)

and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational enterprises and the Lack of processes and compliance mechnisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises.

Concerning those indicators, in case of worsening or the occurrence of a negative event, the Management Company engages directly or collectively the issuer. Where the situation does not improve and/or the issuer does not formally commit to improve it over a one-year period, the Management Company, taking into account the best interest of investors, may sell the position.

- Exclusion criteria:
- Violations of UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational enterprises, Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises;

The investment is considered eligible if the value of the indicators above is zero.

• Controversial Weapons.

No investment is performed if the company directly engages in and/or generates significant revenues from sectors in the above exclusion list.

The PAI listed above are monitored on a quarterly basis.

How did this financial product consider principal adverse impacts on sustainability factors?

Principle adverse impact indicators were considered by applying the strategies specified below:

 The following PAIs are integrated in the investment decision process: GHG Emissions (Total Scope 1 + 2 (tCO2eq), GHG Intensity of Investee Companies (Total Scope 1 + 2 (tCO2eq/EURm), Carbon footprint, Exposure to companies active in the fossil fuel sector.

Concerning those indicators, in case of worsening or the occurrence of a negative event, the Management Company engages directly or collectively the issuer.

Where the situation does not improve and/or the issuer does not formally commit to improve it over a one-year period, the Management Company, taking into account the best interest of investors, may sell the position.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Not applicable. The Sub-Fund does not commit to invest in Sustainable Investments.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable. The Sub-Fund does not commit to invest in Sustainable Investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principle adverse impact indicators were considered by applying the strategies specified below:

• The following PAIs are integrated in the investment decision process: GHG Emissions (Total Scope 1 + 2 (tCO2eq), GHG Intensity of Investee Companies (Total Scope 1 + 2 (tCO2eq/EURm), Carbon footprint, Exposure to companies active in the fossil fuel sector.

Concerning those indicators, in case of worsening or the occurrence of a negative event, the Management Company engages directly or collectively the issuer.

Where the situation does not improve and/or the issuer does not formally commit to improve it over a one-year period, the Management Company, taking into account the best interest of investors, may sell the position.

Principal adverse impacts are the most . significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Sustainable investment objective

Sustainable

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

oid t	id this financial product have a sustainable investment objective		
	X Yes	• No	
x er	It made sustainable investments with an avironmental objective: 81.35%	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective	
	t made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments	

To what extent was the sustainable investment objective of this financial product met

The Sub-Fund pursues the objective of reducing carbon emission exposure in order to achieve climate change mitigation, consistently with the long term temperature goal of the Paris Agreement. Taking into account the GHG intensity of investee companies (total scope 1+2 in tCO2eq/EURm) in the last 3-5 years as well as their forward-looking emission reduction targets, the portfolio manager aims to maximise the net reduction of GHG intensity of the overall portfolio.

No adequate EU Climate Transition Benchmark or EU Paris-aligned Benchmark as qualified in accordance with Regulation (EU) 2016/1011 is available due to the long/short strategy adopted by the Sub-Fund; therefore, the Management Company has adopted an internal model to ensure the attainment of the Sustainable Investment objective.

Kairos International Sicav - ActivESG (continued)

Such internal model complies with art. 12 of Regulation (EU) 2020/1818 because it excludes companies involved in any activities related to controversial weapons, in the cultivation and production of tobacco, companies that, according to Sustainalytics, do not respect the United Nations Global Compact (UNGC) Principles or the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, companies that derive 1% or more of their revenues from exploration, mining, extraction, distribution or refining of hard coal and lignite, companies that derive 10% or more of their revenues from the exploration, extraction, distribution or refining of oil fuels, companies that derive 50% or more of their revenues from the exploration, extraction, manufacturing or distribution of gaseous fuels.

Companies that derive 50% or more of their revenues from electricity generation with a GHG intensity of more than 100g CO2 e/kWh can be invested in if they have a plan to reduce emissions below such level with a timeframe consistent with the objectives of the Paris Agreement. The Management Company monitors the improvement with a view to engage the issuer in case of deviation from the objective.

In addition, the model ensures that investee companies comply with DNSH under the Taxonomy Regulation.

Finally, the following additional exclusion criteria are applied in the selection of the investment universe for the long portfolio:

- thermal coal, with a 25% revenue threshold from power generation;
- Shale Energy Extraction (threshold>10%);
- Oil Sands Extraction (threshold>10%);
- Arctic Oil & Gas Exploration (threshold>10%);
- Nuclear Power Production (threshold>10%);
- Predatory lending;
- Small arms, with a 10% revenue threshold.
- Companies domiciled or listed in the following countries, as well as securities issued by governments or governmental agencies in the same countries are excluded:
 - EU High Risk Third Countries;
 - FATF high-risk jurisdictions;
 - countries under financial embargo;
 - countries with a severe risk rating.

Furthermore, companies having a high controversy level are also excluded.

How did the sustainability indicators perform?

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

Sustainable investment objective	Indicator	Data as at 31/12/2023
Air emission programs	GHG Intensity of investee companies (total scope 1+2 in tCO2eq)	146.47

1)Disclosure pursuant to Article 8 of the SFDR (continued) Kairos International Sicav - ActivESG (continued)

...and compared to previous periods?

Not applicable.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The sustainable investments that the Sub-Fund intends to make are considered not to cause significant harm to any environmental or social sustainable investment objective as the Management Company takes into account all PAIs disclosed in Table 1 of Annex I of the Commission Delegated Regulation (EU) 2022/1288.

A control, which contributes to verifying that the sustainable investments do not cause significant harm to any environmental or social sustainable investment objective, is the exclusion of companies with a severe controversy level or countries with a severe risk rating.

The "controversy level" identifies companies involved in incidents that may negatively impact stakeholders, the environment or the company's operations; such level is rated on a scale from 1 to 5 according to the Management Company's ESG data provider, Sustainalytics SARL (part of Morningstar group). A controversy level of 5 is considered severe. The "country risk rating" combines an assessment of the government's current stock of capital, including natural resources, production, human resources and institutional capital with an assessment of a specific country's ability to manage it in a sustainable manner. Such rating is assessed by the Management Company's ESG data provider on a scale from 0 to 100; a rating higher than 40 is considered severe while 30 is considered average.

Compliance with the DNSH principle is being assessed for every investment as a whole that the Sub-Fund undertakes.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Management Company considers the indicators for adverse impacts set out in Table I of Annex I of the Commission Delegated Regulation 2022/1288.

If the PAI are related to environmental risks, compliance with DNSH under the Taxonomy Regulation is verified at the issuer level; in case social risks are involved, the issuer is required to respect of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

1)Disclosure pursuant to Article 8 of the SFDR (continued)

Kairos International Sicav - ActivESG (continued)

 Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Management Company verifies the respect of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights by verifying an indicator, provided by Sustainalytics, that assesses the companies' impact on stakeholders and the extent to which a company causes, contributes or is linked to violations of international norms and standards. Additionally, the Management Company considers the PAIs "UNGC Principles/OECD Guidelines Violations" and "UNGC/OECD Guidelines Lack of Compliance Mechanism" provide additional details to the Management Company as to what extent the company implements actions to improve such procedures.

Such assessment is also summarized in a synthetic ESG risk indicator which is considered during the securities selection process, by excluding the investment whenever such score is severe (the overall score is severe if at least one of the component factors is severe). The ESG risk rating assesses the issuer's unmanaged risk by evaluating its ESG exposure and the management of material ESG issues.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considers the PAI by applying the strategies specified below:

The following PAI are integrated in the investment decision process: GHG Intensity
of Investee Companies (Total Scope 1 + 2 (tCO2eq/EURm), as well as the Violations
of UN Global Compact Principles and Organisation for Economic Cooperation and
Development (OECD) Guidelines for Multinational enterprises, the Lack of processes
and compliance mechanisms to monitor compliance with UN Global Compact
principles and OECD Guidelines for Multinational Enterprises, Unadjusted Gender
Pay Gap, Board Gender Diversity.

Concerning those indicators, in case of worsening or the occurrence of a negative event, the Management Company may engage directly or collectively the issuer. Where the situation does not improve and/or the issuer does not formally commit to improve it over a one-year period, the Management Company, taking into account the best interest of investors, may sell the position.

- Exclusion criteria:
 - Violations of UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational enterprises, Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises;

The part of the portfolio not invested in Sustainable Investments (#2) mainly consists of cash for collateral or liquidity management purposes as well as government bonds. Minimum environmental or social safeguards apply only to the bond portion.

What actions have been taken to attain the sustainable investment objective during the reference period?

The fund adopted a sustainable investment objective on January 1st, 2023. Actions were taken afterwards to attain with the sustainable investment objective of reducing carbon emissions exposure in order to achieve climate change mitigation, consintently with the long term temperature goal of the Paris Agreement. Taking into account the GHC intensity og investee companies (total scope 1+2 in CO2eq/EURm) in the last 3-5 years as well as their forward-looking emission reduction targets, the portfolio manager will aim to maximise the net reduction of GHG intensity of the overall portfolio. As a result, long position of Ryanir Holding plc, Wizz Air Holdings plc, and Air Liquide Sa, as well as the short position in Intl Consolidated Airline, were liquidated as they were not compatible with the sustainable investment objective.

The Sub-Fund adopts a long/short strategy. Therefore, the minimum of 80% of the Sub-Fund's assets invested in Sustainable Investments (#1) with an environmental objective, i.e. the reduction GHG intensity of investee companies, is referred to the gross exposure. To assess the portion of sustainable investments (#1) a pass/fail approach is being applied. In other words, any investment in a company made by the Sub-Fund that meets all of the binding elements of the investment strategy will be considered as a Sustainable investment as a whole.

Monitoring of the attainment of the sustainable investment objective is conducted on an ongoing basis.

How did this financial product perform compared to the reference sustainable benchmark

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective. 1)Disclosure pursuant to Article 8 of the SFDR (continued)

Product name: Kairos International Sicav - European Long/Short Legal entity identifier: 213800J7TM2FVTGCEJ74

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that	Did this financial product have a sustainable investment objective?
contributes to an environmental or social objective, provided that	Yes X No
the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.	It made sustainable X It promoted Environmental/Social (E/S) investments with an environmental objective % X It promoted Environmental/Social (E/S) Characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 2.33% of sustainable investments
The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852,	in economic activities that qualify as environmentally sustainable under the EU Taxonomy sustainable under the EU Taxonomy
establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with	in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective
the Taxonomy or not.	It made sustainable investments with a social objective It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes environmental characteristics including air emission programs and it also considers the respect of the UNGC Principles and of the OECD Guidelines for Multinational Enterprises.

No benchmark has been identified for this Sub-Fund to attain such characteristics.

How did the sustainability indicators perform?

Sustainability

indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Characteristics promoted	Indicator	Data as at 31/12/2023
Air emission programs	GHG Emissions (total scope 1+2 in tCO2eq)	4499.74
	GHG Intensity of investee companies (total scope 1+2 in tCO2eq)	134.08
	Carbon Footprint	66.06
	Involvement in fossil fuels	3.67%
Respect of UNGC Principles and OECD Guidelines Enterprises		0
	Lack of Processes and Compliance Mechanisms	27.68%

In addition, the Sub-Fund excluded some investments based on the following exclusion list:

1)Disclosure pursuant to Article 8 of the SFDR (continued)

Kairos International Sicav - European Long/Short (continued)

- UN Global Compact;
 - tobacco producers;
- thermal coal, with a 25% revenue threshold from thermal coal mining and exploration and electricity generation;
- small arms, with a 10% revenue threshold;
- controversial weapons;
- predatory lending;
- EU High Risk Third countries, FATF high risk jurisdictions, countries under financial embargo, and countries with a severe risk rating.
- ... and compared to previous periods?

n/a, this is the first year of reporting on such indicators.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable. The Sub-Fund does not commit to invest in Sustainable Investments.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable. The Sub-Fund does not commit to invest in Sustainable Investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principle adverse impact indicators were considered by applying the strategies specified below:

 The following PAIs are integrated in the investment decision process: GHG Emissions (Total Scope 1 + 2 (tCO2eq), GHG Intensity of Investee Companies (Total Scope 1 + 2 (tCO2eq/EURm), Carbon footprint, Exposure to companies active in the fossil fuel sector.

Concerning those indicators, in case of worsening or the occurrence of a negative event, the Management Company engages directly or collectively the issuer.

Where the situation does not improve and/or the issuer does not formally commit to improve it over a one-year period, the Management Company, taking into account the best interest of investors, may sell the position.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

1)Disclosure pursuant to Article 8 of the SFDR (continued)

Kairos International Sicav - European Long/Short (continued)

- Exclusion criteria:
- Violations of UN Global Compact Principles and Organisation for Economic Cooperation 0 and Development (OECD) Guidelines for Multinational enterprises, Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises;

The investment is considered eligible if the value of the indicators above is zero.

Controversial Weapons. 0

No investment is performed if the company directly engages in and/or generates significant revenues from sector in the above exclusion list.

The PAI listed above are monitored on a quarterly basis.
